

Referral Service Summary (simulated data)

|                   |     |                         |                        |                      |                        |
|-------------------|-----|-------------------------|------------------------|----------------------|------------------------|
| Total Referrals   | 120 | Contacted within target | Overdue: not contacted | Urgent not escalated | Records passing checks |
| Targets (assumed) |     | 65%                     | 5                      | 4                    | 78%                    |
|                   |     | 80%                     |                        |                      | 95%                    |

|                |           |
|----------------|-----------|
| Month starting | Referrals |
| 1/06/2026      | 30        |
| 1/07/2026      | 54        |
| 1/08/2026      | 36        |

|                   |           |
|-------------------|-----------|
| Status            | Referrals |
| New               | 8         |
| Contacted         | 21        |
| Awaiting info     | 18        |
| Consent pending   | 11        |
| Enrolled          | 40        |
| Unable to contact | 8         |
| Declined          | 14        |

|          |                           |
|----------|---------------------------|
| Priority | Avg days to first contact |
| Urgent   | 1                         |
| High     | 3.7                       |
| Routine  | 6.63                      |

|           |                     |                           |
|-----------|---------------------|---------------------------|
| Ethnicity | Referrals contacted | Avg days to first contact |
| Māori     | 24                  | 4.8                       |
| Pacific   | 16                  | 3.7                       |
| Asian     | 16                  | 6.0                       |
| European  | 41                  | 5.3                       |
| Other     | 6                   | 3.7                       |

Simulated data with small numbers per group: no conclusions should be drawn. With real data, review this view with the team to check that timeliness is equitable.

Key findings

- 65% of contacted referrals were reached within the assumed target times (target 80%); 37 were contacted late.
- 5 referrals are overdue for first contact.
- 4 urgent referrals have no escalation recorded and should be reviewed.
- 27 of 120 records carry a data-quality flag (missing fields, possible duplicates, or inconsistent dates or consent).

Recommended Actions

- Contact the 5 overdue referrals and record the outcome.
- Confirm escalation decisions for the 4 urgent referrals.
- Correct the 27 flagged records with referrers, starting with the 5 that have no priority.
- Review whether target times are realistic, since routine referrals average about 6.6 days to first contact.

Based on simulated data and assumed targets.
